DETAILED ACTION

Drawings

The drawings are objected to because an error is noted in Figs. 5 and 16, in which porous film 4b should be -- black --, not "transparent". Therefore the word "transparent" should be changed to -- black -- for the lower-layer porous film 4b. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 15 and 16 are rejected under 35 U.S.C. 102(e) as being anticipated by Ahn et al ('222).

As now worded, claims 1, 2, 15 and 16 read on Figs. 2A-3C, and the accompanying texts of Ahn et al.

Regarding claim 1, the sheet-form porous body, the liquid filled in each hole of the porous body, the pair of substrates, the transparent electrode, and the counter electrode of claim 1 are equivalent to the elements of the display apparatus of Ahn et al represented by numerals 107, 113 and 111, 101 and 119, 117, and 103, respectively.

For claim 2, reference should be made to numeral 111 of the patent.

For claim 15, see column 4, lines 34-41 and column 5, lines 35-42.

For claim 16, see particles 111 of the patent.

Allowable Subject Matter

Claims 3-14, 17 and 18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
